It will be easier for you if you wait until he has finished making a breakthrough to finish all his actions. The next thing he will do is go after your soldiers. If your soldiers get close, go to any action menu and select "Stop" while he is attacking them. This will make him stop and look at you, and you will see him attempting to attack your soldiers. In other words, he will be going after the soldiers, but the action menu will be selected. If you wait until he has gone down the hallway and if you go after him, he will lose the game and you will be able to kill him. If he doesn't get caught, he will follow the soldiers. He will begin looking for a way to get back up to you. Your soldiers will still be at the gate, and he will go after them. Don't let him through the gate, and if he gets caught, go down the stairs and kill him again. Don't kill him the first time, or he will be faster the second time. Continue to watch your soldiers, and eventually he will come upstairs. If he runs into the sniper, you can kill him. If he comes up to the corridor, he will go through the doorway. Click on him and he will go into the corridor. He will see the soldier, who will begin to run away. Click on 82157476af
